

To Prevent Fires

- Smoke only in the designated place where ashtrays are available.
- Wet cigarette butts before throwing them.
- Don't plug too many cords into a single socket.
- Don't leave fires unattended.

3

- Keep the areas around your building tidy and clean.
- Don't leave combustibles which may attract arsonists.
- For safe welding : Keep combustibles away. Have a fire extinguisher at hand. Have the fire protection manager or the fire warden supervise the work.

4

To Protect Your Workplace from Fires

◆ Fire Protection Equipment

- Know where they are located.
- Learn how to use them.
